## Are you tired of your vehicle rusting out?

Have you spent hundreds of dollars on repairing your frame and/or body parts? Have you sent your vehicle to the junk yard when it still runs good.....**JUST BECAUSE IT RUSTED AWAY UNDERNEATH??!!**

Bob Ross Auto and Tractor repair has an affordable answer for you. This product can add 7 to 10 years or more, to the life of your vehicle, not to mention, possibly increasing trade in value!!!!

We can undercoat coupes and sedans, SUVs, light pickups, medium and heavy trucks, utility, horse and box trailers. Any unit needs to be done 2 years in a row at the current cost.

**Cars and SUVs: \$240 plus tax**

**Light pickup trucks: \$290 plus tax**

**Duallys: \$315 plus tax**

**Medium, heavy trucks and all trailers:**

**Price quoted by size**

**Offering volume discounts!**

Whether your vehicle is newer with little rust, or already has significant rust...we can stop or drastically slow down the corrosion!

Customers who have already been undercoated with our product are driving in the salt and liquid calcium of Pennsylvania winters.....confident that they are protected.

## Does your undercarriage look like this???

Chevy Cavalier

Chevy Trailblazer

Ford Escort

## Frequently Asked Questions

### Q: What is this product?

It is our own formula, which we produce in house. It has been personally tested for 8+ years, with better results than other commercially produced undercoating. Our product gets tacky, remains pliable, and does not peel, flake, or wash off. It stays on the vehicle, not on you or your mechanic.

### Q: What areas get sprayed?

Inside doors, rocker panels, cab corners, bed sides, every nook & cranny possible, and, of course, all underside surface areas. Our application process is second to none.

### Q: Do I need to clean the underside of my vehicle before treatment?

It is not necessary for it to be spotless, but excessive mud should be removed.

### Q: How soon after treatment can I use the undercarriage wash option at a car wash?

Please wait at least 4 months.

### Q: When should I clean up residual drips?

Please wait 1-2 weeks for those areas. The longer you wait after the 1-2 week mark, the more difficult it is to remove.

### Q: Is there anything I can do to aid cleaning the residual drips before being sprayed?

Yes, put a coat of wax on your vehicle at the car wash. This is optional, not mandatory.

### Q: What can I use to clean residual drips?

Buster, Simple Green or Totally Awesome
